

FROM DISCONNECTED SYSTEMS TO INTELLIGENT OPERATIONS.

Senfi 5.2 unifies building systems, live data, workflows and AI in one open Digital Twin platform.

01 | THE CHALLENGE

Too many dashboards.
Too many alarms.
Too little context.

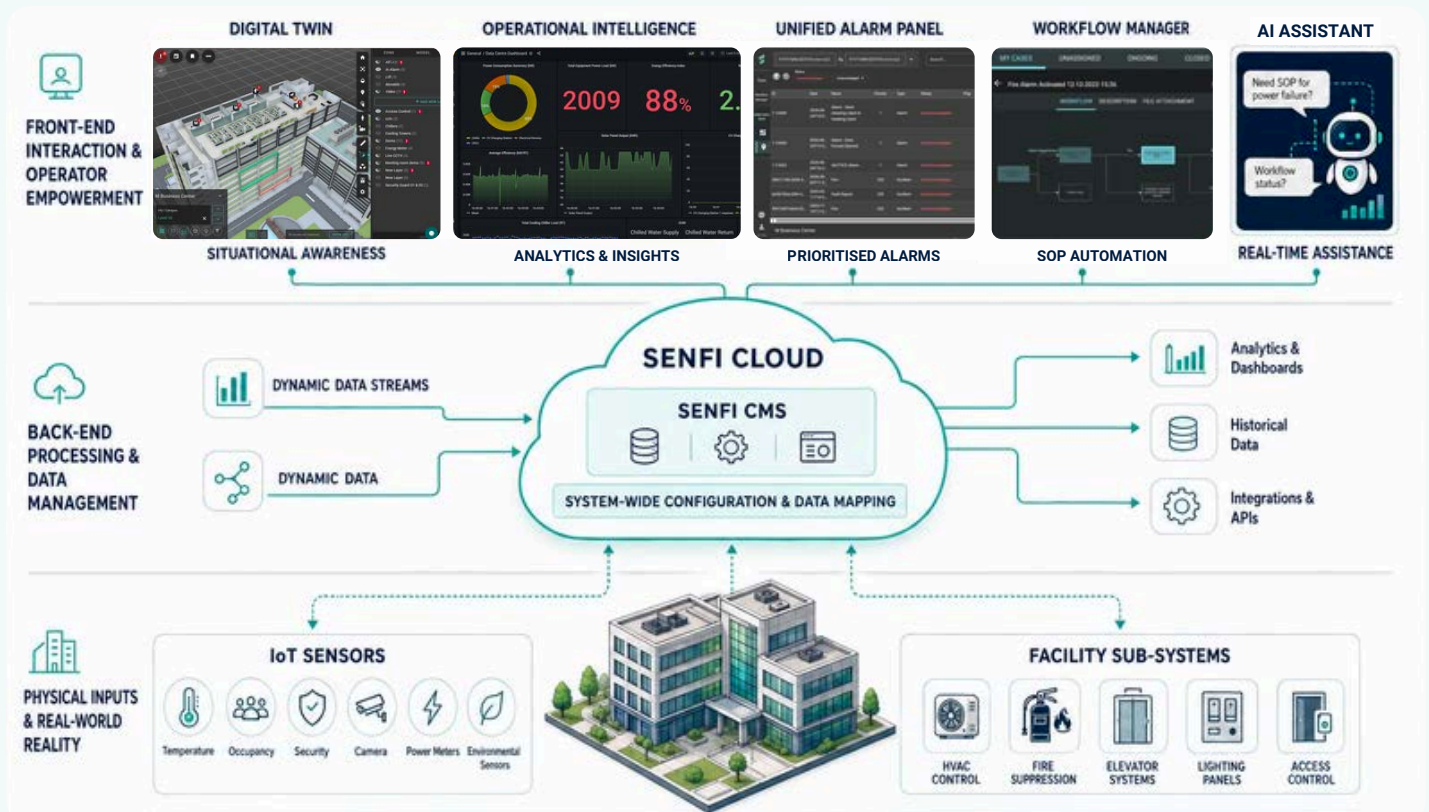

02 | HOW SENFI HELPS

One spatial view connects what is
happening, where it is happening and what
to do next.

03 | HOW IT WORKS

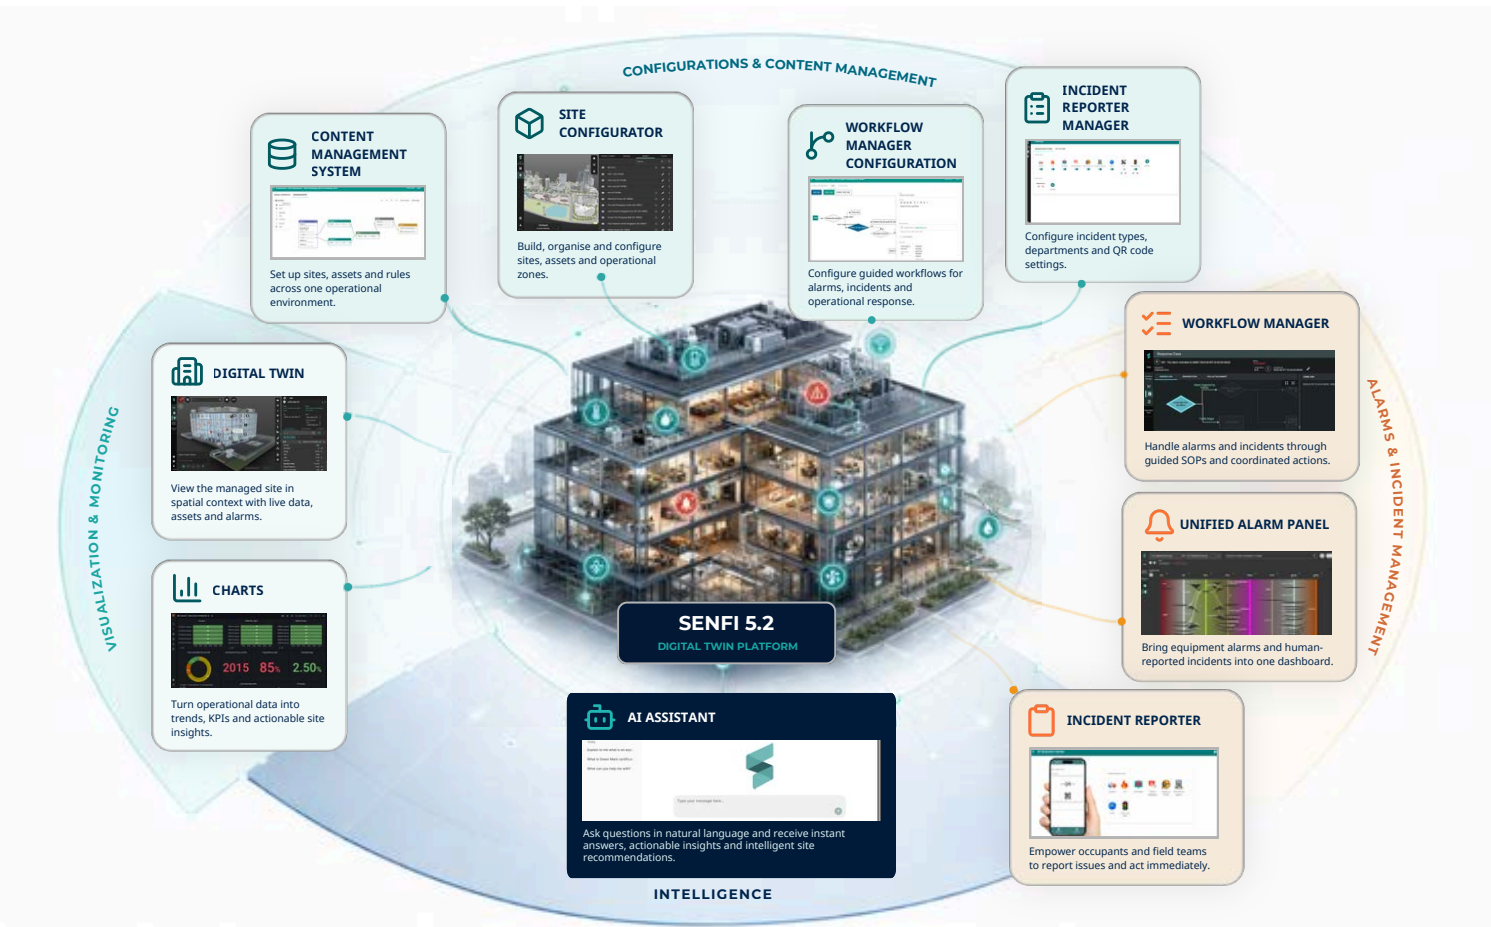

Senfi Operations Ecosystem. One Operational Truth

Turning data into awareness through context.

Full features available in Senfi 5.2

Ten applications. One operational intelligence platform.
Configure, visualize, respond and understand - within one connected Digital Twin ecosystem.

05 | OUTCOMES

LESS COMPLEXITY

FASTER RESPONSE

GREATER AWARENESS

AI-ASSISTED DECISIONS

Context turns data into awareness—and awareness into action.

See Every Space. Understand Every Event.

Senfi delivers real-time visual intelligence through a live 3D Digital Twin and unified monitoring in a single pane of glass, empowering faster awareness and smarter decisions.

Live 3D Digital Twin

Explore your building in full 3D with real-time data overlays from IoT sensors and integrated systems.

Key Benefits:

- ✓ Real-time data visualisation
- ✓ True-to-life 3D representation
- ✓ Better understanding of complex spaces

3D Situation Awareness

Gain real-time situational awareness across your entire facility or city with immersive 3D views.

Key Benefits:

- ✓ Holistic situational awareness
- ✓ Instant visual context
- ✓ Identify what matters, respond faster

3D Site Configurator

Build and manage your Digital Twin with intuitive tools for assets, zones, visual layers and immersive walkthroughs.

Key Benefits:

- ✓ Accelerate Digital Twin deployment
- ✓ Maintain organised digital environments
- ✓ Deliver immersive user experiences

Unified Operations Workspace

A unified workspace where operators monitor, investigate, collaborate, and respond from a single interface.

Key Benefits:

- ✓ Everything in one workspace
- ✓ Access every connected system
- ✓ Reduced application switching

Run Operations Smarter

Streamline everyday operations with configurable workflows, structured content management, and real-time incident handling so your teams can act faster, stay aligned, and maintain operational excellence.

Content Management System (CMS)

Centralize the management of your Digital Twin with intuitive tools for sites, assets, users, integrations and automation.

Key Benefits:

- ✓ Centralise Digital Twin management
- ✓ Configure assets, sites and users with ease
- ✓ Automate workflows with no-code rules

Workflow Manager & Configurator

Design, configure and automate workflows and SOPs to standardise processes and improve team coordination.

Key Benefits:

- ✓ No-code workflow builder
- ✓ Reusable templates and components
- ✓ Automated routing and notifications

Unified Alarm Panel

All alarms, events, and alerts from multiple systems are unified into one intelligent panel.

Key Benefits:

- ✓ One view for all systems
- ✓ Prioritised and contextualised alerts
- ✓ Accelerated incident resolution

Incident Reporter

Empower anyone to report issues in seconds with a simple, mobile-friendly reporting experience.

Key Benefits:

- ✓ Quick and easy reporting
- ✓ Photo, location and file attachments
- ✓ Real-time submission and tracking

Intelligence That Drives Action

Interact with your Digital Twin using natural language to uncover insights, analyse trends, understand building performance, and receive AI-powered recommendations for faster, more informed decisions.

AI Assistant

An AI-powered assistant providing instant answers, actionable insights and intelligent recommendations for your buildings.

Key Benefits:

- ✓ Ask questions using natural language
- ✓ Trace alarms to their root cause
- ✓ Identify real issues from event data
- ✓ Identify monitoring gaps instantly
- ✓ Navigate directly to Digital Twin assets
- ✓ Access SOPs and operational guidance instantly

Smart Building Analytics

Senfi, using Grafana, visualises operational data through interactive dashboards for smarter, data-driven decisions.

Key Benefits:

- ✓ Visualise data with interactive dashboards
- ✓ Monitor energy usage and performance
- ✓ Analyse historical operational trends
- ✓ Track KPIs in real time
- ✓ Generate reports for audits and compliance
- ✓ Build dashboards tailored to your needs

Deploy Anywhere. Access Everywhere.

Senfi is built on enterprise-grade infrastructure that is secure by design, connects everything seamlessly, and empowers every user anytime, anywhere.

Cloud Platform

A resilient cloud platform delivering secure, reliable and scalable performance as your operations grow.

Key Benefits:

- ✓ Elastic scalability on demand
- ✓ Enterprise-grade security by design
- ✓ Fast, secure access from anywhere

Multi-Device Accessibility

Access Senfi anytime, anywhere, on any device with a seamless, consistent and optimised user experience.

Key Benefits:

- ✓ Consistent experience across all devices
- ✓ Real-time access on the go
- ✓ Seamless switching between devices

Unified Connectivity

Connect and integrate all building systems, IoT devices and enterprise applications through open standards and APIs.

Key Benefits:

- ✓ Open and vendor-neutral architecture
- ✓ Real-time data unification
- ✓ Seamless integration with legacy and new systems

Role-Based Access Control

Manage users, roles and permissions with granular control to ensure secure and appropriate access across your organisation.

Key Benefits:

- ✓ Granular role and permission management
- ✓ Secure access to the right data
- ✓ Full audit trail and accountability

Beyond today's Digital Twin

From connected buildings to autonomous intelligence
A cumulative journey—each release strengthens the Digital Twin foundation for what comes next.

The future isn't about managing more systems.

It is about buildings that continuously learn, adapt and improve.

Senfi provides the foundation for that future.
Discover how Senfi transforms disconnected building systems into one intelligent operational platform.
